

Parent Access to Blackboard APS's Learning Management System

What is Blackboard?

Blackboard is a Learning Management System that allow teachers to conduct classes in an online environment. Teachers can post announcements, assignments, course work and grades. This system allows the learner to access classroom information and classwork outside the school's physical space.

Parent Access

Parents may access their child's classes by visiting aps.blackboard.com . Your username is your child's student number prefixed with a "p", i.e., p123456789 and your password will be the same configuration.

What should I see once I login?

You should see a list of classes posted by your child's teachers under various titles. If a class does not appear please feel free to contact the teacher. Click on one of the courses. Navigation buttons are on the left of the screen. Not all content is visible at one time since teachers can release data at various time and some content is visible only to students.
